ABOUT ME

I am an electronic engineer with professional experience in technical support, data engineering, and network engineering. Over this period I have developed a deep understanding of various aspects of the technology industry, including troubleshooting hardware and software issues, designing and implementing data pipelines, and managing network infrastructure. Recently I have been training in software development area working with programming languages like Java (Spring Framework), JavaScript, Angular, HTML, CSS and also with databases like MySQL. Apart from the technical work, I have several other interests that I am passionate about. I have a keen eye for design and enjoy creating compelling visual content. I also like to stay active and pursue the love for sports. I am an avid runner and enjoys training for marathons and other endurance events like playing football, basketball and volleyball.
